

# Robyn Hannigan, Provost Clarkson University

**THINK.** Through Clarkson University's Center of Excellence in Health Waters our research advances new solutions to challenges facing regional and national communities. Our primary efforts center on new technologies to detect and remediate threats to human health and environmental quality.

**MAKE.** At Clarkson we are driven to solve critical issues at the intersection of food-water-energy. Whether developing new systems for food production or new locally sourced foods, Clarkson's entrepreneurs of the future are leading the way.

**IGNITE.** Driving new solutions to market begins with igniting a passion for our natural world. Clarkson's energy research for a new economy accelerates communities and supports new business development across the globe.
